THE PAIN

How to gather qualitative data from your ships?

Managing a ship is a real-time task. Problems occur, tasks are completed, and information and assistance from the company are required in real-time. Companies use the phone, messaging, and emails to communicate with ship staff, as these are closest to real-time for them

THE SOLUTION

SAVVYMARINER

Brilliant. In everyway.

We have engineered a cloud platform that puts communication first, so that we will gather quality data from ships.

Why to switch to savvy?

Our simple and intuitive solution improves safety and efficiencies at sea and shore.
